

Where Are the Froggies?

Where are the froggies when the north winds blow?

We cannot see them in the ice and snow.

Deep, deep down in the mud they lie.

Froggies sleeping with tight closed eyes.

When the warm spring sun comes out.

Froggies wake and jump about.

Oh how happy they will be.

A springtime world they will see.

*Bears - snug & warm in a cave they lie
Caterpillars - Snug & warm in a chrysalis they lie, caterpillars changing to
butterfly*
